Career Objective

BSIT student and software developer seeking an opportunity to grow with a professional development team. Experienced in building full-stack web applications and mobile apps, serving as project manager and frontend developer in team projects, and handling everything from analyzing requirements and designing wireframes to developing, testing and deploying, with a strong eye for clean and user-friendly interfaces. Eager to contribute, continuously learn new tools and technologies, and help deliver reliable software.

Bachelor of Science in Information Technology **2023 - Present**
Sorsogon State University – Bulan Campus
Zone 8, Bulan, Sorsogon

Technical-Vocational-Livelihood – Information and Communications Technology **2016 to 2022**
Sisters of Mary of Banneux, Inc.
Biga II, Silang, Cavite

Projects

SorSUpport: Complaint Ticketing System sorsupport-production.up.railway.app

- A web-based complaint ticketing system for Sorsogon State University – Bulan Campus where students submit concerns that the Student Development Services Office reviews, routes and tracks until resolved, with role-based access, confidential tickets, message threads, email notifications, analytics and an audit trail.
- Developed with Laravel, Blade, Tailwind CSS and MySQL using Claude Code for design, coding and debugging support; tested through manual functional, role-based access and end-to-end testing, API testing in Postman, with automated PHPUnit tests generated using Claude Code; and deployed on Railway.
  Role: Full Stack Developer and QA Tester

Sweet Bite Bakery System sweet-bite-bakery-system.vercel.app

- A bakery ordering web application with product browsing, cart and checkout, order history, user profiles and an admin dashboard for managing products.
- Designed the UI in Figma, then developed it with a React and Tailwind CSS frontend and a Laravel REST API using GitHub Copilot and ChatGPT for guidance; tested the ordering flow end to end and verified API endpoints and authentication in Postman; and deployed the frontend on Vercel and the API on Render.
  Role: Full Stack Developer and QA Tester
